

# 5 1/2" IADC537 Tricone

## PRODUCT SPECIFICATION

Size: 5 1/2" (139.7mm)  
IADC code: 537  
Connection thread: 2 7/8" API Reg pin  
Bearing: metal sealed journal bearing  
Nozzle size: 10/32"  
Nozzle material: tungsten carbide  
Weight: 18kg

## OPERATION SUGGESTIONS

Weight On Bit: 0.50-1.05KN/mm  
Rotary Speed: 220-40 r/min

## APPLICATION FORMATION

Medium soft with low compressive strength and harder abrasive stringers, such as hard shale, hard gypsolyte, soft limestone, sandstone and dolomite with stringers, etc.

- Actual drilling parameters must be determined for specific applications.
- The upper limits of WOB and RPM recommended in above should not be used simultaneously.
